JRC-IV-HA-12-SIP-KNX

12.6-inch panoramic smart control panel

A premium wall-mounted smart control panel combining video intercom, home automation, security monitoring, and indoor comfort control in one elegant interface. Designed for villas, apartments, hotels, and smart building projects across the Middle East.

JRC Smart Living - Curated for modern living in the Middle East.

WHY THIS PRODUCT

The JRC Smart Control Panel is a premium 12.6-inch panoramic touch display designed for luxury residential, hospitality, and commercial smart building applications. It brings intercom communication, automation control, indoor comfort monitoring, and scene management into one elegant wall-mounted device.

Through a refined user interface, residents can control lighting, curtains, climate, security, and customized smart scenarios from a single central point.
